THE COVER FLOWER

'Yule Tide', the Cover Flower, is a brilliant orange-red single sasanqua that blooms on a very bushy upright plant. Foliage is dark green. Nuccio's Nurseries introduced it with the expectation that it would be popular for landscaping, and their expectations have been realized. They built up a large stock before releasing it and at the end of the season had nothing left except gallon can sizes. Blooming time is October through December. . .
