THE COVER FLOWER

C. Japonica 'Nuccio's Gem'

People who have had the opportunity to visit the back lath house of Nuccio's Nurseries have been watching a white formal seedling with beautiful symmetry and lasting quality, identified as #6506. The Nuccio brothers thought for awhile that they might sell the accumulated stock and all the rights thereto to another nursery. They have changed their minds and are now releasing through normal trade channels the large stock they have built up. They have named it 'Nuccio's Gem', which reflects their high rating of the seedling in that they have elected to associate their own name with it.

NOTICE

The **Huntington Botanical Garden** is seeking a camellia enthusiast to be in charge of their **Camellia Garden**. He will be expected to carry out the more exacting horticultural tasks and to supervise two helpers.
