PLEASE READ BEFORE ORDERING

ALL OF OUR CAMELLIAS are container grown. In California, our Camellias will be shipped either in their containers, or will be balled and wrapped in waterproof material. Outside of California, in order to facilitate packing and eliminate excess weight, thereby cutting transportation costs, Camellias will either be balled or bare-rooted (unless requested otherwise).

Notice to residents of the states of Alabama, Arizona, Arkansas, Florida, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas, Virginia and Foreign Countries: All shipments of Camellias must be bare-rooted, and will be re-balled in peat moss, and properly wrapped for shipping. We are experienced in shipping bare-rooted Camellias and have found the above method very successful. All states and countries requiring bare-root shipment of Camellias, as listed above, must be inspected and certified by the Los Angeles County Dept. of Agriculture. The fees charged for this service are as follows and must be added to your order.

1-10 plants \$13.00

11-50 plants \$21.00

51-200 plants \$39.00

WE HAVE SUCCESSFULLY shipped balled and bare-rooted Camellias all months of the year, but for best results we advise shipment from mid-October through March (we strongly advise against bare-root shipping after early March), during which time shipments will be made weekly. From April through September shipments will only be made during the first and third weeks of each month. Due to the holiday overload on shipping lines, we do not ship from Dec. 1 through Jan. 1.

ALL AZALEAS offered in this catalog are grown in No. #1 containers (approx. 6" x 7") (some slow growing and dwarf varieties may be in pots approx. 3" x 4") and will be shipped in same, or balled and wrapped. Azaleas can be shipped safely throughout the year. Shipments of Azaleas to states and foreign countries which require bare-rooting (or if requested) a charge of 50¢ per plant will be added. Notice to residents of the above mentioned states and foreign countries: An inspection certificate is required for all plants, including Azaleas. Please use the above fee schedule.

Notice to the residents of Hawaii: Your state does not require a certificate of inspection, but all plants, including Azaleas, must be bare-rooted. Please remember to add 50¢ per Azalea for bare-rooting.

Notice to Residents of Oregon: Plants into Oregon may either be shipped WITH SOIL (inspection certificate required) or BARE-ROOT (no certificate required). Please indicate your preference. Please remember to add 50¢ for each Azalea bare-rooted.

GUARANTEE

We give no guarantee that our plants will live and grow, but we do guarantee our stock to be well rooted, well grown, true to name and properly packed for shipments. Claims for shortages and errors must be made immediately upon receipt of shipment and we will gladly rectify our mistake, but in no instance will our liability be more than the purchasing price.

Please note that our responsibility ceases upon delivery to forwarding companies and any claims for damages en route are to be made upon them by the purchaser. Risks and costs of transportation belong to purchaser.

WE ARE PROUD of our Shipping Department and we have countless complimentary letters from out-of-state purchasers of our Camellias and Azaleas. All stock is expertly and efficiently crated and packed in strong, lightweight crates and tamper-resistant cartons. Every order, regardless of size, is custom packed.

IN THE PAST years, we have shipped Camellias and Azaleas throughout the United States and many foreign countries with the utmost success, and feel confident that with our experience, our customers are receiving the finest quality plants, as a result of the best packing and crating possible.

We are exerting every effort to produce the very best stock that can be grown. We secure our propagating wood from only the best type of plants, and by doing this, we furnish you stock that is the best possible for you to get anywhere, regardless of price. If you will give us your order, we know you will be more than pleased with our quality plants.

TERMS OF SALE — CRATING CHARGES

*Please send your remittance with your order.
We cannot process any order on which
full payment has not been received.*

All shipping orders must be received in writing. Sorry, no telephone orders.

With first order be certain to use the special order blank on the back page of this catalog. Prices in this catalog are subject to change without notice. Please specify the way you wish to have us make shipment (UPS, parcel post, or Greyhound bus). When no instructions are given, we will ship your order by the method we feel best suited for your location and size of order.

Notice to foreign customers: All orders must be paid in U.S. currency. To avoid domestic banking charges, please use an international money order. Also, be sure to find out if your country requires you to have an import permit. Please list nearest major airport.

California customers add 8.25% sales tax to total.

CRATING CHARGES: In order to help cover crating costs, please add to your order one of the following crating charges:

If your order is:	Your crating charge is:
\$15.50 or less	\$5.00
Over \$15.50 but not over \$50.00	\$10.00
Over \$50.00	\$10.00 for the first \$50.00 plus 10% of the amount over \$50.00

Please Note: Crating charges do not cover the cost of transportation.

See Transportation Charges, below:

TRANSPORTATION CHARGES are the responsibility of the customer; all orders are F.O.B. Altadena, California. Freight charges will be collected C.O.D. by the carrier.

Foreign orders: Please add 30% of your order amount for estimated transportation costs. At the time of shipment an adjustment will be made to bill you for, or refund you, any difference.

NOTE! WHEN ORDERING—THE FOLLOWING INFORMATION CAN BE HELPFUL:

Approximate weights of Camellia plants in the following sizes:

Size	Container	Balled	Bare-Rooted

Azaleas shipped bare-rooted, please add 50¢ per plant.

NOTICE TO RESIDENTS OF COLD WEATHER AREAS:

We cannot guarantee against weather damage of our plants in transit. Transportation companies, likewise, will not insure against such damage. We advise, therefore, placing your order either early (Sept.-Oct.) or late (April), or as your weather dictates.

CAMELLIA CULTURE

SOIL: Basically, all Camellias require the same culture. They prefer a well-drained soil that is high in humus content and slightly acid. In preparing the soil for planting in the ground, mix equal portions of sandy loam and peat moss, by volume. If leaf mold is available, it may be used in place of peat moss.

PLANTING: Dig the planting hole twice as large as the root ball and one and one-half times as deep. Fill the bottom of the hole with the prepared soil and tamp down firmly so that the top of the root ball, when placed in the hole, is 1" ABOVE the soil surface, as there will be some settling. The only way Camellias are temperamental is in the depth of the planting. The air requirement of the root is high, and when planted too deep, the roots will smother. The root crown should never be more than 2" below the surface of the soil. Fill in around the sides of the root ball with this same mixture, tamping it down firmly with the feet as you fill, then mound soil 3" high in the form of a saucer on the outside rim of the planting hole. Fill this saucer with water.

WATERING: Camellias should be moist at all times, but caution should be taken against their being WET at all times. Water well and deeply, but only as often as your own local weather conditions demand. Too much water, too often, will cut off the air the roots must have. During the flowering period, watering should be watched, as the mature flower is 90% water and a drying out of the plant can cause undersized blooms, as well as bud drop. Camellias will use large quantities of water during the summer growing periods. For container-grown Camellias, you will generally need to fill your containers once a week in the summer, and in the winter, you should be able to stretch the period to approximately ten days. On very dry days, or when the temperature rises above 85°, sprinkle the foliage and the mulch in the late afternoon.

FERTILIZING: Fertilizing, or feeding, should start with the first signs of growth, even though the plant is still blooming. Caution should be taken never to overfeed. Camellias that have been injured with over-fertilizing take several seasons of special care to recuperate. Cottonseed meal, or commercial food specifically for Camellias, should be used. Your local nurseryman or garden shop will carry the prepared mixture best suited to your own local conditions. Follow the directions as printed on the package. If the plant is dry, water well the day before feeding—never feed a dry plant. Feed every 6 or 8 weeks from April through September.

PESTS AND DISEASE: Other than feeding and watering, Camellias require very little care. Some insect and pest control is necessary to insure a healthy plant. Scale and mites are the most serious threat, as they extract the plant juices and interfere with the normal development of foliage and stem growth. Generally speaking, Camellias rarely need spraying, so consult your local nurseryman and make certain that spraying is necessary.

PROTECTION: *C. Japonica*, *C. Reticulata* and the hybrids need protection from hot mid-day sun. For the flower's sake, the whites and pale pinks will need more shade than the deeper colors. "Shade" is a very relative term; in climates where humidity is high, Camellias can stand more sun than in climates that are hot and dry. *C. Sasanqua* is able to stand full sun even in hot dry climates, but does equally well in light shade. As to protection from cold, *C. Sasanqua* will stand temperatures of 10 degrees above zero to 5 degrees below zero with no injury. The *Japonicas* will stand temperatures to 5 degrees above zero, but the complete double flower types will have buds frozen and destroyed at this temperature. *C. Reticulata* is recommended for very mild areas, or glass house culture only. The hybrids, because they are hybrids, will vary from variety to variety as to the cold each will stand. Some of them have gone through temperatures of zero with little ill effects.

Blooming season of all Camellias listed is denoted by E, M, L.

E: Early (Mid-September-November)

M: Midseason (December-February)

L: Late (March-April)

SINGLE JAPONICAS

For centuries the people of Japan have shown an appreciation for the beauty of the wild Camellia Japonica (Yabu Tsubaki). Widely found in Japanese art and highly treasured for flower arranging, the single Japonica is pure Camellia beauty in its simplest form. We are most pleased to be able to offer the following varieties. (A special note of thanks to Messrs. Satoshi Kimura, Hideo Shimizu and Hiroshi Terada for selecting the three wild Camellias from Oshima Island.)

HAKUSHU —White. Single. Small. Somewhat tubular. Medium, upright growth. M.	11.00

CAMELLIA SASANQUA

Sasanquas, sometimes referred to as "Sun Camellias" because of their tolerance to direct sunlight, are the first Camellias to come into bloom, generally reaching peak bloom in November in Southern California. Varieties tending to peak later are designated by "L"; varieties showing earlier color are indicated by "E."

CLEYERA JAPONICA—This early to mid-summer blooming Camellia relative produces an abundance of tiny (1/2"-3/4"), very pale yellow single blossoms that are delightfully fragrant. The Camellia-size foliage is very Ficus-like in texture and appearance, new growth being reddish brown. With a vigorous, upright, somewhat spreading growth habit, this handsome plant can be maintained as a large shrub or a small tree.

HYBRID CAMELLIAS

Hybrid Camellias are those having two or more species (usually Japonica mixed with other species) in their parentage. Both flower and growth habit will vary greatly depending upon species involved. To help identify the various parentages the following code is used:

R—Reticulata Hybrid. These usually produce large to very large blossoms on vigorous, open growing plants.

S—Saluenensis Hybrid. Although these vary greatly in growth habit, ranging from very compact to open and leggy, Saluenensis hybrids characteristically are small-leaved, Sasanqua-like plants that produce small to medium flowers, are very profuse, and tend to set buds even when young. Many are reputed to be cold hardy.

SP—These are actually Pitardii hybrids, but their overall appearance and performance are that of Saluenensis hybrids.

* **ANGEL WINGS**—(S) White shaded orchid pink. Medium, semi-double with narrow, upright petals. Medium. Somewhat loose growth. M.

ANTICIPATION—(S) Deep rose. Medium to large peony. Vigorous, upright, somewhat rangy growth. Good for espalier. M. 11.00

LASCA BEAUTY —(R) Rich soft pink. Very large, semi-double with heavy textured, thick petals. Upright, compact growth. M.	15.50			
LAVENDER SWIRL —(S) (Ozzie Blumhardt)—Soft lavender pink. Large formal double. Vigorous, open, upright growth. M-L.	11.00	30.00		
* LEMON TWIST^N —([Guilio Nuccio x Pitardii] x Chrysanth). Off white to pale yellow, deeper at center. Medium, semi-double. Vigorous, upright, somewhat open growth. L.				
LILA NAFF —(R) Silvery pink. Large, semi-double with wide petals. Vigorous, compact, upright growth. M.	15.50			
LITTLE LAVENDER —(S) Lavender pink. Miniature to small anemone form. Vigorous, compact, upright growth. M.	11.00	30.00		
LUCKY STAR^N —(S) Rich orchid pink, semi-double. Medium. Unusual shape due to offset rows of narrow, upward curved petals. Medium, bushy, upright growth. M-L.	11.00	20.00		

		12-18"	18-24"	24-36"
MARGARET HILFORD —(R) Deep red, occasionally mottled white. Very large semi-double. Vigorous, open and upright. E-M.		\$15.50	\$	\$33.00
MILO ROWELL —(R) Deep pink. Very large, irregular petalled, semi-double to loose peony. Vigorous, upright growth. M.		15.50		
MINIMINT —(S) Small formal white to pale coral pink with light pink bars or stripes. Upright, slow and compact. M-L. (Note: Because of compact habit, sizes may be smaller than the above measurements.)		15.50		
MISS TULARE —(R) Brilliant rose red, large to very large. High built rose form to ruffled peony. Vigorous, upright growth. M.		15.50	23.00	
MOONRISE^N —(Granthamiana Hybrid) Very large, semi-double, white to blush pink with pale yellow at base of petals. Vigorous, upright, open growth. Distinctive foliage. E-L.		15.50		
* MOONSTRUCK^N —(Japonica-Cuspidata hybrid) Striking red buds opening to medium single white blossoms toned pink both at edge and near center. Medium, upright growth. M-L.				
NICKY CRISP —(SP) Light orchid pink. Medium to large semi-double. Slow, compact growth. Fresh and clean looking. M-L.		11.00	20.00	
NIGHT RIDER —(S) An outstanding Kuro Tsubaki seedling. Small, very dark black-red semi-double. Very attractive plant with new growth deep maroon. Medium, upright, somewhat loose growth. M.		15.50		
NUCCIO'S RUBY^N —(R) Large to very large, dark rich red, ruffled petalled. Semi-double. Upright, bushy growth. M.		15.50		
OLE —(S) Small to medium, rich orchid pink. Rose form. Profuse. Buds are red, not green, making this an unusual and attractive plant. Compact. Very late.		15.50	23.00	
ORCHID BEAUTY^N —(S) Light orchid pink, edged deeper pink. Medium to large formal double. Medium, upright, open growth. Excellent for espalier. M-L.		11.00		
ORCHID PRINCESS^N —(S) Pale orchid pink. Large semi-double. Upright, very vigorous spreading growth, excellent for espalier. M-L.		11.00		30.00
OTTO HOPFER —(R) Large, irregular semi-double, brilliant, light red. Vigorous, upright growth. L.		15.50		
PAPER DOLLS^N —(Irrawadiensis hybrid) Light pink toning deeper toward edges. Small formal. Profuse. Vigorous, upright, somewhat columnar growth. E-M.		15.50		
PAVLOVA —(R) Clear bright red. Very large, semi-double. Vigorous, spreading, upright growth. M-L.		15.50		
PINK DAHLIA —(S) Orchid pink, miniature to small formal double with slender pointed petals. Medium, upright growth. M-L.		15.50	23.00	
PINK GRANTHAMIANA —Large to very large, flat single pink with notched petals. Vigorous, upright growth. Foliage and growth much like Granthamiana. E-M.		15.50		
PRUDENCE —(SP) Orchid pink. Miniature semi-double. Medium, compact, upright growth. Somewhat columnar. M.		11.00		
QUEEN BEE^N —(R) Beautiful soft pink. Very large, irregular semi-double. Medium, upright growth. M-L.			23.00	
RED CRYSTAL —(R) Very large, single to semi-double. Bright scarlet red. Bushy, upright growth with excellent foliage. M.		15.50		

		12-18"	18-24"	24-36"
ROB ROY —(Reticulata—Saluenensis hybrid) Medium to large, irregular semi-double, pale pink to deeper pink edge. Upright, bushy growth. M.		\$15.50	\$	\$
ROYALTY —(R) Bright pink to red in center of petals. Very large, semi-double with wavy crinkled petals. Medium, upright growth. M-L.		15.50		33.00
RUTA HAGMANN —(R) Very light coral pink loose peony. Very large. Medium, open upright growth. M-L.		15.50		33.00
* SAN MARINO —(R) Dark red. Large semi-double with heavy textured petals. Medium upright growth. M.				
SCENTED SUN —(Higo parentage) Large to very large. Irregular semi-double, flared stamens. Nice mild fragrance. White striped pink. Sometimes sports rose and blush pink flowers. Vigorous, upright. M.		11.00		
SHANGHAI LADY^N —(Granthamiana hybrid) Very large, light orchid pink. Irregular semi-double. Vigorous spreading growth. E-M.		15.50		
SNIPPET —(SP) Soft pink to white center petals. Small, semi-double. Dwarf, compact growth. M. (Note: Because of compact habit, sizes may be smaller than the above measurements.)		15.50		
SNOW DROP —(Fraterna hybrid) Miniature, single, white edged pink. Open upright growth. E-L.		15.50		
SNOW DROP CASCADE —(Snow Drop seedling, Steve Campbell) White shading to soft pink towards outer edges. Miniature to small, single to semi-double. Spreading growth. E-M.		15.50		
SOUTH SEAS —(S) Silver pink flushed rose pink on margins. Medium, semi-double to very loose peony form. Vigorous, upright growth. M.		11.00		
* SPRING DAZE —(S) Blush pink edged coral pink. Small to medium. Formal to rose form. Medium, bushy, upright growth. M-L.				
SPRING FESTIVAL —A fine Cuspidata seedling. Medium pink fading to light pink at center. Miniature, rose form, double. Mass bloomer. Narrow, upright growth. Attractive reddish brown new growth. Very sun tolerant. M-L.		11.00		30.00
* STANDING OVATION^N —(R) Very large red, semi-double with upright petals. Vigorous, open, upright growth. M.				
SUPER STAR —(S) White, large semi-double, long narrow petals. Medium, upright growth. Both plant and flower very Japonica-like. E-L.		11.00		
SWEET JANE —(Japonica x Transnokoensis) Pale pink center shading to deeper pink on outer petals. Miniature, peony form. Vigorous upright growth. M.		15.50		
TAYLOR'S PERFECTION —(S) Large, semi-double. Light orchid pink. Medium, upright growth. M-L.		11.00	20.00	30.00
TERRELL WEAVER —(R) Dark orange red. Large semi-double to loose peony form. Vigorous, full and upright. M.		15.50		
* TINY STAR —(Fraterna hybrid) Light to medium pink, 1" to 2" starshaped, semi-double with no stamens. Small leaves. M.				
TIPTOE —(S) Silvery pink to deeper pink edge. Medium, semi-double. Compact, upright growth. M.		11.00		
TROPHY^N —(R) Large irregular rose form. Medium orchid pink. Handsome, robust grower. Large, thick, dark green leaves. Outstanding when treated with gibberellic acid. L.		15.50		

		12-18"	18-24"	24-36"
TULIP TIME —(S) Light pink. Medium, tulip-formed single. Profuse. Vigorous, open growth. M.		\$11.00	\$20.00	\$30.00
UTSUKUSHI ASAYE —(S) Beautiful coral pink semi-double, sometimes mottled white. Medium, upright, somewhat open growth. M-L.		11.00		
VALENTINE DAY —(R) Very large, formal double, rosebud center. Medium salmon pink. Slow, upright growth. M-L.		15.50		
VALLEY KNUDSEN —(R) Deep orchid pink. Large to very large. Semi-double to loose peony form. Vigorous, bushy, upright growth. M-L.		15.50	23.00	33.00
WINNER'S CIRCLE —(R) Very large, salmon pink, semi-double to loose peony form. Vigorous, bushy, upright growth. M-L.		15.50		
W. P. GILLETT VAR. —(R) Bright pink mottled white. Large, single to semi-double with irregular petals. Vigorous, upright, open growth. M-L.		15.50		
YUME —(Shishi Gashira x Yuhsienensis, Dr. Kaoru Hagiya) Small, single pink blotched white. This is a genetic, not virus, variegation, and unique in that the pink will very often alternate with the white, petal by petal. Profuse and very, very showy! Medium, spreading, somewhat loose growth. M-L.		15.50	23.00	

NEW YELLOW HYBRIDS

Mr. Tadao Yamaguchi of Ishikawa, Japan, is one of the true pioneers of hybridizing for yellow Camellias. His success started with Shoko ("First Yellow" - 1989). We are very proud to offer the following hybrids through the generosity of Mr. Yamaguchi so that other hybridizers can benefit from his many years of hard work.

KICHO—(C. Japonica Hatsu-Arashi x C. Nitidissima). ** Pale yellow. Small tubular shaped single. Vigorous, upright growth. E-M. \$15.50 \$ \$

KIHO—(C. Nitidissima x C. Japonica Hakuho) Light yellow. Small to medium, tubular, wavy petalled single. Vigorous, upright growth. E-M. 15.50

KI-NO-GOZAN—(C. Japonica Gozan-No-Yuki x C. Nitidissima) Light yellow. Small to medium, Cup-shaped single, thick petals. Vigorous, upright growth. 15.50

KI-NO-JOMAN—(C. Japonica Jomanji x C. Nitidissima). Even though yellow did not result from this cross, it did result in a beautiful shade of salmon pink. Small, single, profuse. Excellent, bushy upright growth. M-L. 15.50 23.00

SHOKO—(C. Japonica Shigi-Tatsusawa x C. Nitidissima). Light yellow. Small, single, thick petals. Vigorous, open upright growth. E-M. 15.50 23.00

Mr. Kazuo Yoshikawa of Osaka, Japan, has undoubtedly pursued more avenues than any other hybridizer in his goal to produce yellow Camellias, to name a few: Saluenensis hybrids, Reticulata hybrids, Japonicas and Sasanquas. Mr. Yoshikawa's efforts have opened many opportunities for future hybridizers. We are proud to offer a few of his varieties.

KI-NO-MOTO #92—(A background of three species: C. Japonica, C. Nitidissima and C. Reticulata.) Light yellow. Medium single, cup shaped. Silow, spreading growth. M-L. 15.50

KI-NO-MOTO #95—(Reticulata-Japonica hybrid Lasca Beauty x C. Nitidissima). Light yellow. Large semi-double. Slow, upright growth. M-L. 15.50

KOGANE NISHIKI—(Japonica Betty Foy Sanders x C. Nitidissima). Slender stripes of red on a pale yellow background. Small, single, trumpet shaped. Vigorous upright growth. M-L. 15.50

KOGANE-YURI—(Saluenensis-Reticulata hybrid Barbara Clark x C. Nitidissima). Light yellow. Small, single, tubular form. Heavy bud set and prolific bloomer. Medium, upright, slender growth habit. M. 15.50 23.00

**Correct botanical name: *Camellia Nitidissima* variety *Nitidissima* (formerly *Camellia Chrysanthia*).

FRAGRANCE

Fragrance has been the one quality most notably lacking in Camellias in spite of their other beautiful characteristics. For many years hybridizers from around the world have been attempting to breed fragrance into Carnellias, in particular, by using the very sweet smelling species, *Camellia Lutchuensis*. We know you will be pleased with any of the following fragrant *Lutchuensis* hybrids.

FRAGRANT PINK —Deep pink. Miniature, loose peony form. Medium, upright, spreading growth. M-L.	\$15.50	\$	\$33.00
HIGH FRAGRANCE —Pale ivory pink with deeper pink shades at edgc. Medium, peony form. Vigorous, open growth. M-L.	15.50	23.00	33.00
KOTO-NO-KAORI —Small, single. Rose pink. Medium, upright, lacy growth. E-M.	15.50	23.00	33.00
MINATO-NO-AKEBONO —Single. Light pink toned deep pink. Miniature. Medium, upright, somewhat loose growth habit. E-M.	15.50	23.00	33.00
MINATO-NO-HARU —Deep pink single. Miniature. Medium, upright, slightly loose growth habit. M-L.	15.50		
SCENTED GEM —Beautiful hybrid miniature. Tiny fuchsia pink anemone with white petaloids. Slow, lacy growth. M.	15.50		
SCENTUOUS —Miniature to small loose peony. White with pink near edges. Growth upright and willowy. M.	15.50		
SOUZA'S PAVLOVA —Clear pink. Medium peony. Medium open growth. M-L.	15.50		33.00
SPRING MIST —Small, semi-double, blush pink shading to white. Vigorous, upright, open growth. M.	15.50	23.00	33.00
SWEET EMILY KATE —Blush pink shading to pale pink in center. Small to medium, irregular, loose peony form. Slow, pendulous growth. M-L.	15.50	23.00

CAMELLIA JAPONICA: HERME, KRAMER'S SUPREME, SCENTSATION, SPRING SONNET.

HYBRID CAMELLIAS: SCENTED SUN.

CAMELLIA SPECIES: FORRESTII, FRATERNA, GRIJSII, GRIJSII ZHENZHUCHA, KISSI, LUTCHUENSIS, MIYAGII, SYNAPTICA, TSAII, YUSHSIENENSIS, YUNNANENSIS.

HIGO CAMELLIAS: NIOI FUBUKI.

WABISUKE: FUKURIN WABISUKE, HINA WABISUKE, SHIRO WABISUKE, SHOWA WABISUKE.

RELATED GENUS: CLEYERA JAPONICA.

HIGO CAMELLIAS

The Higos from Japan, considered a strain of Japonica, offer excellent landscape-type Camellias because of their simplicity, profusion of bloom, beautiful single plum blossom-style flowers (flared stamens) with excellent texture that fall in one piece.

ASAGAO—Pale pink. Medium to large, single, flared stamens. Vigorous, bushy growth. E-M.	\$11.00	
GOSHOU-ZAKURA—Rich, medium pink. Medium, single, central stamens. Profuse, vigorous, upright growth. E-M.	11.00	
* HI-NO-MARU—Red. Medium, wavy, single. Excellent stamens. Slow, upright, compact growth. M.		
* JITSU-GETSU-SEI—Red splotched white. Medium, flat single, flared stamens. Vigorous, upright growth. M-L.		
* KAGO TSURUBE—Small to medium. Coral rose pink. Short petals but very broad flare of stamens. Medium, upright growth.		
KUMAGAI—Medium to large. Deep pink. Flared stamens. Frequent white petaloid center. Very vigorous, upright, open growth. M.	11.00	30.00
KUNI-NO-HIKARI—Rose red. Medium, single, flared stamens. Medium, upright growth. M.	11.00	
MANGE TSU—White. Medium, single, golden flared stamens. Vigorous, upright growth. M.	11.00	20.00
MIKUNI-NO-HOMARE—Veined pink with occasional red bar or stripe. Fine white border. Medium, single, flared stamens. Vigorous, upright growth. M.	11.00	20.00
* MIKUNI-NO-HOMARE RED—Red sport of Mikuni-No-Homare. A good red Higo. M.		
MIYAKO-NO-HARU—Medium pink. Medium to large, single, flared stamens. Vigorous, upright growth. M.	11.00	20.00
NOI FUBUKI—White striped rose. Medium to large, wavy, single with petaloids or high crown of stamens. Mild fragrance. Vigorous, open, upright growth. M-L.	11.00	
OHKAN—Sport of Yamato Nishiki. Medium. Single, flared stamens. White with rose red border. Slow, compact growth. M.	15.50	
OZEKI—Large rose pink single. Flared stamens with occasional pinkish white petaloids. Vigorous, upright and open growth. M.	11.00	30.00
SHIRANUI—Rose red. Medium, wavy single, flared stamens. Upright, compact growth. M.	11.00	
SHIRA OGI—White. Medium, single, heavy flared golden stamens. Medium, spreading growth. M.	11.00	30.00
SHIRA YUKI—Medium, single white with round, ruffle edged petals and flared golden stamens. Medium, upright growth. M-L.	11.00	
* SHOWA-NO-HIKARI—Pink striped rose. Medium, single, extremely flared stamens. Medium, upright growth. M-L.		
TENJU—Blush pink. Medium to large single, flared stamens. Vigorous, upright, open growth. M.	11.00

RUSTICANA CAMELLIAS

(Snow Camellias)

The Rusticanas, considered by many to be a Japonica sub-species, come from the higher elevations of Japan where they are insulated from the cold by a snow covering. When the snow melts in the spring, they burst into a mass of color. Rusticanas are generally characterized by their bushy and compact growth, smaller flowers, and profuse blooming habit.

AI-NO-IZUMI—Small light pink formal double. Compact bushy, upright, somewhat columnar growth. M-L.	\$11.00	\$20.00	\$30.00
BOTANYUKI—Miniature, anemone form. Blush pink with yellow petaloid center. Medium, upright growth. M.	11.00	20.00	
HANAMI GASA—White heavily striped rose red. Medium to large rose form double. Vigorous, bushy, upright growth. M-L.	11.00		30.00
HIMATSURI—Miniature, loose anemone to peony. Rose red mottled white. Bushy, upright growth. M.	11.00		30.00
HIME SHIRA YUKI—An unusual tiny miniature. Semi-double white. Compact, dark green foliage. M-L.	11.00	20.00	30.00
ICHIRAKU—Miniature, bell shaped, single white. Medium, upright, bushy, columnar growth. M.		20.00	
* ITSUKAMACHI—Miniature to small, brilliant red, semi-double. Medium, low, bushy, rounded growth. M.			
ITSUKAMACHI VAR.—Variegated form of Itsukamachi. Brilliant red blotched white. Very showy. M.	11.00		
IZUMI—Coral pink. Medium, semi-double. Bushy, round growth. M-L.	11.00		30.00
KASUGA YAMA—Small, irregular semi-double. Red blotched white. Resembles a small Daikagura. Bushy, upright growth. M.	11.00	20.00	30.00
* KAZA HANA (White Rusticana)—Small, single white with spaced, crinkled petals. Medium, compact, upright growth. M-L.			
NISHIKI KIRIN—Small rose form. Pink striped red. Very showy. Compact, shrubby, upright growth. M-L.	11.00		
SHIRO KARAKO—Miniature to small, white, anemone form. Vigorous, spreading growth. M.	11.00		30.00
YUKI GESHIKI—Blush pink. Small to medium. Anemone to peony. Petaloids creamy. bushy, compact and upright plant. M-L.	11.00	20.00	
YUKI KOMACHI—Medium, pale pink to white in center. Irregular semi-double. Sweet pea type. Narrow, upright, compact growth. M-L.	11.00	20.00	30.00
* YUKI OGUNI—Light coral pink. Small semi-double to loose peony. Somewhat slow, compact, spreading growth. E-M.			

RUSTICANA SEEDLINGS

WABISUKE

12-18" 18-24" 24-36"

The Wabisuke (pronounced "wa-bis-kay") Camellias of Japan, although Japonica-like in general appearance, are thought to be of hybrid origin. Generally, the plants are small to medium leafed and rather shrubby. The flowers are tubular, single and small. Curiously, most have stamens without, or with very few, pollen sacs (anthers). They produce plants of simple beauty in the garden, and the exquisite single blossoms are a flower arranger's delight.

* FUKURIN WABISUKE —Small. Single. Light pink bordered white. Fragrant. Medium, upright growth. E-M.	\$11.00	\$	\$
* HINA WABISUKE —Small. Single. Rose pink. Fragrant. Medium, upright growth. E-M.	11.00		30.00
JUDITH —Miniature to small. Single. Deep pink. Slow, compact, bushy growth. M-L.	11.00		
* OTOHIME —Small. Single. Rose pink often blotched white. Medium, upright, compact growth. E-M.	11.00		
SHIRO WABISUKE —Small. Single. White. Fragrant. Medium, upright growth. E-M.	11.00		
SHOWA WABISUKE (C. Saluenensis 'Apple Blossom') —Small single white toned light pink. Very fragrant. Medium, upright growth. M.			
SUKIYA LITTLE PRINCESS —Small. Single. Very light pink. Stamens sometimes have pale anthers. Medium, upright, open growth. E-M.	11.00		

FOLIAGES

There are a number of Camellias that are as attractive, if not more so, for their leaf patterns and growth habits as they are for their flowers. Any of the following would add interest to any Camellia collection. (You will note the use of the word "Benten" on several varieties. This word has been used in Japan to indicate a variety on which the leaf is darker in the center and bordered by a lighter margin. We have decided to continue this tradition with such varieties developed in this country as well.) "J" indicates Japonica; "S" Sasanqua.

BENTEN-KAGURA —(J) Foliage sport of Daikagura. Irregularly shaped green leaf finely bordered yellow. Rose red medium to large peony. More compact than parent. M.	15.50		
DEBUTANTE BENTEN —(J) A beautiful sport of Debutante discovered in her garden by Shirley Real, a dear friend and avid plant enthusiast. Light yellow green margin, deeper green center, irregularly shaped leaf. Not profuse, but produces a light pink peony flower like its parent, though slightly smaller. A vigorous, upright and very attractive plant. E-M.	15.50	23.00	
EGAO CORKSCREW —(Probably a Sasanqua-Japonica hybrid). Outstanding mutation from a great camellia, Egao. Not only a distinctive zig-zag growth habit which is super for bonsai, but a beautiful flower form as well. Ruffled petals, semi-double to loose peony form. Pink. Medium, spreading growth. M.	15.50		
GINYO TSUBAKI —(J) A very unusual and beautiful Camellia shrub. Small light gray green leaves with a narrow, dark green, heavily serrated margin. Small, tubular red single flower. Upright, very compact. Slow growing but strong. M-L.		Scions Only. See Page 52	
GOLDEN SPANGLES —(Saluenensis Hybrid) Foliage sport of Mary Christian. Rose pink. Small single. Bushy, upright growth. Beautiful distinctive foliage. Green foliage marked with a light yellowish green, irregular pattern in center. M-L.	15.50		

* Sorry. Not available this season.

12-18" 18-24" 24-36"

* HANA-DAIJIN-BENTEN —(S) Foliage sport of Hana-Daijin. Irregularly shaped leaf. Green with occasional gray green stripe bordered with a light yellow margin. Large deep rose pink single. Upright but very slow. E-M.	\$15.50	\$	\$
HANA-DAIJIN SPECIAL^N —(S) Excellent Benten sport of Hana-Daijin-Benten. Foliage gray green lightly bordered yellow. Large deep rose pink single. Good bud set. Medium upright growth. E-M.	15.50		
KEGON-NO-TAKI —(J) An unusual growth pattern Camellia with a mounding, cascading, somewhat slow habit. Although not particularly profuse, this unique variety produces a nice small single, tubular white flower. M.	15.50		
KUJAKU TSUBAKI —(J) The "Peacock Camellia," so-called because of its long and narrow peach-like leaf and its tubular, slender petalled flower. Small, single, red mottled white. Semi-cascading growth habit. M-L.	33.00		
NOKOGIRI-BA TSUBAKI —(J) ("SAW LEAF CAMELLIA") Small, light red, flat single. Small foliage, heavily serrated, like a sawblade. Slow, bushy, spreading growth. M-L.	Scions Only. See Page 52		
* REIGYOKU —(J) Beautiful foliage Camellia. Glossy green leaves with patch in center that starts out pink when new and becomes light yellow at maturity. Flower small, orange red, single. Growth some-what loose but compact. M.	Scions Only. See Page 52		
RYU-GUH —(J) Small orange red single. Beautiful dark green foliage with heavy ribbing and notched edges. Slow, bushy, spreading growth. M-L.	Scions Only. See Page 52		
SAKAZUKI-BA TSUBAKI —(J) ("SAKE CUP CAMELLIA") Medium, rose red, cup shaped with round petals. Compact, upright, strong medium growth with dark green, cupped, thick foliage. L.	15.50		
SASANQUA COMPACTA^N —(S) Very dark green dwarf Sasanqua. Blooms only occasionally but produces a medium single white blossom bordered rose red. Exceptional garden plant for compact areas. E.	Scions Only. See Page 52		
SHIBORI EGAO CORKSCREW^N —Pink mottled white form of Egao Corkscrew.	15.50		
* SILVERADO^N —(S) White with faint rose border. An unusual foliage color. Frosty, light gray green small leaves. New growth is reddish brown. Medium, single. E.	23.00		
TAIYO —(J) Rich green foliage with irregular yellow pattern along center of leaf. Medium single, coral rose. Medium, upright, somewhat spreading growth. E-M.	15.50		
UNRYU —(J) Medium upright plant with very unusual zig-zag growth pattern. At each leaf, growth proceeds in opposite direction at 45° angle. Single, small, deep pink. M.	15.50		
* WHITE DOVES BENTEN^N —(S) Foliage sport of White Doves. Irregularly shaped gray green leaf with a fine mustard yellow margin. Semi-double white flower somewhat smaller than parent's. Growth likewise is more compact. E.	Scions Only. See Page 52		
* YASURI-BA —(J) ("RASP LEAF") Small gray green leaf with new growth reddish. Very coarse foliage, almost sandpaper-like. Very compact, upright and bushy. Blooms only rarely, producing a small single red. M-L.	34		

AZALEAS IN THE LANDSCAPE

No other flowering shrub has contributed more to the gardens of America than the Azalea, when one considers that by proper selection of varieties, color in the garden can be had from October through June. Azaleas can be handled as pot plants, mass planting, specimens, tree types, espalier and hedges. The versatility of this plant is unlimited. However, most Azaleas are at their best when planted in groups or drifts. An ideal situation for them would be among high trees, so spaced, as to allow the sun and light to penetrate, yet providing intervals of shade to give the plants some respite from the hot sun. Where there are no trees, the north or east side of the house, or high fence, would be desirable. Although it is true that many Azaleas thrive in full sun, especially along the coastal areas, the Southern Indicas are best suited for full sun planting.

CULTURE-SOIL—Azaleas may be grown successfully in various acid soil mixtures, such as leaf mold (redwood, pine and oak), sand and light loam, but for best results, pure peat moss or 2/3 peat and 1/3 soil planting have proven best. The hole need not be over 15" deep and 18 to 24" in diameter. Do not set the plant lower or higher than it was originally growing. Always soak peat moss thoroughly before using. Fill around ball of plant firmly, and make certain that good drainage is maintained.

WATERING—Azaleas, much like Camellias, should be moist at all times, but caution should be taken against their being WET at all times. Water well and deeply, but only as often as your own weather conditions demand. In areas such as Southern California, where summer months are dry and arid, one may generally expect to water once a week. Spraying of the foliage in the late afternoon of hot days is very beneficial.

FERTILIZING—Azaleas are basically light feeders and caution should be taken never to overfeed. Three to four feedings spaced from March through September (6 to 8 weeks) are sufficient. Cottonseed meal, or a commercial Camellia-Azalea food, should be used. In Southern California, use a tablespoon for each feeding of a plant which is about one foot high and one foot across. The labels on your fertilizer will generally advise you to cut the amounts in half for plants in containers. Never fertilize an Azalea when leaves show a yellow or paleness between the veins. This is usually caused by lack of available iron, and will, most often, respond to application of one of the many new chelated irons. Continue the use of iron, instead of fertilizer, until foliage becomes green.

PRUNING—Heavy pruning of undesirable branches should be done when they are at their peak of bloom and used as cut flowers. Most varieties of Azaleas require one good pinching, or pruning of new spring growth, in June or July, thus creating more branches and bushiness for fall bud setting. However, when plants are young and vigorous, such as the Southern Indicas, pruning on new growth should continue through September.

PEST CONTROL—While Azaleas are comparatively free of insects and disease, the most commonly encountered pests are aphids and mites, mites being the more serious. Consult your local nurseryman for the sprays best suited for your area and spray only as needed.

Satsuki Azaleas

All varieties in this Satsuki list are \$7.00 each unless otherwise indicated.

Satsuki Azaleas are truly the treasures of Japan. For several centuries the Japanese gardener has enjoyed the luxury of the Satsuki Azaleas because of their adaptability to bonsai culture. They are late blooming (May-June), and they have very dense growth habits and are excellent evergreen, spreading shrubs. Along with this, the many flower forms and many color combinations on one plant (sports) make them the ideal bonsai plants. However, we at Nuccio's Nurseries feel confident that the Satsuki Azalea will contribute greatly to our gardens as landscape and potted plants for the same reasons they are so popular as bonsais.

Their culture is basically the same as all evergreen azaleas such as Kurumes, Belgians and Southern Indicas, etc., and they are as hardy as most Kurumes (5°) depending on age of plants, 3 to 4 years, and suddenness of temperature change.

Because of their distinctiveness and beauty, we offer the following list of varieties, selected from hundreds. The following format is used in the descriptions:

1. Flower:

A—Color: The word "variations" for the many sports or combinations of colors, and the word "center" for the base color when blooms are bordered deeper or toned.

B—Size: Very small— $1\frac{1}{2}$ "; Small $1\frac{1}{2}$ -2"; Medium— $2-2\frac{1}{2}$ "; Medium large— $2\frac{1}{2}$ -3"; Large—3-4"; Very large—4-5"

C—Form: Single, semi-double and double with petals that are wavy, frilled, pointed, round, spider or narrow and spaced, tubular or bell shaped.

2. Growth Habit: Most Satsuki varieties are considered semi-dwarf or compact, 3' or less in 12 to 15 years, and with dense, spreading growth (wider than tall), and good branching qualities without pruning. However, they do respond to pinching and pruning for desired forms.

Very slow—12"; Slow— $1-1\frac{1}{2}$ "; Medium— $1\frac{1}{2}$ -2"; Fast (vigorous)—2-3'

3. Blooming Season: Satsuki means *fifth month*, and, of course, most varieties are late blooming (May-June). In mild climates, such as California, many varieties will spot bloom in the fall and winter months. However, with all varieties pruned in mid-July, the following schedule and code is used:

E—Early (March-April); M—Mid-season (Mid April-May); L—Late (Mid May-June);

VL—Very Late (Mid June-July)

Numbering system for multi-colored Satsukis and guarantee limitation: Many of the Satsukis offered here characteristically produce several different colors of flowers on one plant. The most common pattern for such varieties is to produce three different colors: a white striped with the other two colors (which we call "#1"), a light color ("#2"), and a dark color ("#3").

While it is this erratic sporting quality that makes these varieties of Satsuki so beautiful and fascinating, it is this same quality that presents difficulties for propagators as well. We attempt to take our cuttings from stock that is the #1 version of a variety. However, because our cuttings are taken from new growth not yet bloomed, it is very possible to cut from a #2 or #3 branch. A cutting grown from a #2 branch will generally produce two colors, the light color (#2) and the dark color (#3), while a cutting taken from a #3 branch tends to produce only the dark color.

Our guarantee for Satsukis is the same as for our other Azaleas and Camellias, namely, that they will be well rooted, well grown, true to name, and properly packed for shipping. However, it should be noted that while we take great care to send you the #1 version of the variety you select, we cannot guarantee that you will not receive a #2 or #3 version instead. But even these, too, are beautiful. Some #2 and #3 versions are so outstanding, in fact, that we are purposely propagating and including them in our Satsuki list.
