## WELCOME VISITORS!

Most of our customers come to us through the United States mail, but we enjoy having visitors stop in to see us, and we cordially invite you to do so whenever you can. We are open daily **except Wednesday**, and business hours are from 8:00 to 5:00. During the period from June 1 through September 15 we are also closed on Sundays.

## TERMS OF SALE

Please send your remittance with your order. California customers add 3% sales tax to the total. Prices in this catalog are subject to change without notice, and are all F.O.B. Altadena, California. Please specify the way you wish to have us make shipment (parcel post, express, motor freight, railroad freight or air freight). When no instructions are given we will ship via Railway Express. We make no crating charge on orders over \$20.00, but if your order amounts to less than \$20.00, please add \$1.00 for the first plant and 25c for each additional plant ordered in order to cover crating costs.

## GUARANTEE

We guarantee all plants to be true to name, to be well grown, and properly packed for shipment. Shortages, damages or losses should be reported to the transportation agency immediately on arrival, and if you will notify us, we will give you all the assistance we can. At no time will we be responsible for more than the purchase price.

## PLEASE READ BEFORE ORDERING

All of our Camellias are container grown (1-gal., 3-gal., 5-gal. and 6-gal.) and will be shipped in their containers. Handled this way Camellias can be shipped and planted every month of the year.

We propagate over 650 varieties of Camellias, many of which are too rare to be in the catalog list. Information desired on varieties not listed will be supplied on request.

We also have large, specimen plants of many varieties, and we will quote prices for these on request.

Notice to residents of the states of Alabama, Florida, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee. All shipments of Camellias into these states will be bare-rooted, reballed in peat moss, burlapped and wrapped in waterproof paper. We are experienced in shipping bare-rooted Camellias and have found the above method so successful that we are giving the same guarantee we give our container grown Camellias. We have successfully shipped bare-rooted Camellias all months of the year, but for best results we advise shipment from mid-September through May.

## NEW VARIETIES

Our breeding and testing program evaluates each year literally hundreds of new varieties of camellias, both of our own and other breeders' origin. To our already very large list of varieties we have added 17 more this year, dropping some which have become displaced by superior new strains.

# How to Grow Fine Camellias

### Where and How to Plant

Even though Camellias can and are being successfully grown in full sun, the best exposure is filtered shade (trees, lath, etc.), morning, or afternoon sun. If planting a Camellia in full sun, it should be done in the winter months in order to allow the plant to become acclimated before summer heat.

Dig a hole at least twice as deep and twice as big around as the size of the container or ball of the plant. Add 1/2 peat moss or leaf mold to soil taken from hole and mix thoroughly. If soil is heavy (clay or adobe) use at least 50% peat moss or leaf mold. Fill the hole with sufficient amount of mixed soil so that after firming, the top of the plant ball will set at least one inch above the surrounding area. **NEVER PLANT TOO DEEP.** After setting plant in hole, fill with the mixed soil and pack firmly. Make a basin around the plant and give it a thorough watering to settle soil. Place about one inch of peat moss in basin for mulch.

### Watering

Do not allow plants to become dry, and more important, **never keep** soil soggy wet. Either condition can cause buds to drop or loss of plant. Always bear in mind that a Camellia likes to be kept reasonably moist, but also requires good drainage.

### Fertilizing

Camellias should be fertilized during the summer growing months, starting as early as March and not later than August. Three feedings in this period are sufficient, i.e., April, June and August. Space feedings at least 30 days apart. Any of the better known acid fertilizers may be used, preferably cottonseed meal. For amount follow directions on package. **NEVER OVER-FERTILIZE.**

**WE ARE PROUD** of our Shipping Department and we have countless complimentary letters from out-of-State purchasers of our Camellias. All stock is expertly and efficiently crated and packed in strong light-weight crates and tamper-proof cartons. Every order, regardless of size, is fitted into custom-built crates.

**IN THE PAST** ten years we have shipped Camellias throughout the United States and many foreign countries with the utmost success, and feel confident that with our experience our customers are receiving the finest quality plants as a result of the best packing and crating possible.

**WELCOME, FRIENDS!**

The above map will help you to drive straight to our nursery when you're in town. We very much like to meet our friends from all over camellia-land, and we'll be most happy and proud to show you our nursery. Business hours are from 8:00 to 5:00 every day except Wednesday. From June 1 to September 15 we are also closed on Sundays.

## SPECIAL BONUS OFFER

When our customers send us a nice order we like to show our appreciation by shipping extra camellias. But so many times we are uncertain what to send because the variety we select may be one already a part of your collection. So we are making this special bonus offer in order to give you an opportunity to select the extra plants yourself. There are no restrictions on varieties—you may choose any kind in this catalog according to the following schedule:

If your order amounts to **\$20.00** or more, select any \$2.50 camellia free of additional charge.

If your order amounts to **\$40.00** or more, select any camellias totaling \$5.00 in value.

If your order amounts to **\$60.00** or more, select any camellias totaling \$7.50 in value.

If your order amounts to **\$80.00** or more, select any camellias totaling \$10.00 in value.

Larger orders earn bonus plants according to the same ratio

# SASANQUA CAMELLIAS

In the past few years the Sasanqua has at last been gaining the added popularity it rightfully deserves. Its hardiness, early and profusion of bloom (September to January), small, dark evergreen foliage make it a valuable addition to our landscape. Sasanquas thrive in full sun or a partially shaded area and may be used as hedges, ground covers, vines or specimens. Care and culture of the Sasanqua is identical to that of the Japonica.
