THE COVER FLOWER

C. japonica "King's Ransom"

This month's cover flower is one of the two All-America Camellia Selections for 1960-1961, the other being the hybrid "Bonnie Marie" which was the cover flower of last month's CAMELLIA REVIEW. "King's Ransom" is an introduction of C. Norwood Hastie's Magnolia Gardens in South Carolina. It is a pale pink C. japonica of unknown parentage, with a definite resemblance to "Debutante". Blooms, averaging 4½ inches in size, are of loose peony form. Habit of growth is upright. Growth is more rapid than for most camellias, and both plant and flower have proved very hardy.
