Thoughts From the Editor	2

THE COVER FLOWER

Harvey Short thought enough of his new 'Sunset Glory' sport that he named it after his good friend, now deceased, Owen Henry of Ramona, California. 'Owen Henry' is a semi-peony form flower with high built center petals. Most flowers average 5½ inches, with unusual coloring — pale lavender cast over deeper pink, with prominent veinings to the center of the flower showing strawberry shadows. There is some white edging in the petals. It is a vigorous grower with large handsome leaves. Blooming time is from November through March. To quote Harvey, "truly a show flower".
