## THE COVER FLOWER

### C. Japonica 'April Lynn Poe'

This month's cover flower is a new seedling of W. Lee Poe of Birmingham, Alabama. Color is a blush pink. The flower will go to 5 to 6 inches not gibbed. It was shown 6 times in 1970 shows, won Best Seedling and received the A. C. S. Certificate in 6 shows. The plant is a strong and healthy grower. It is being propagated and distributed by Ralph May's Gerbing Camellia Nursery of Fernandina Beach, Florida.

## DO YOU WANT AN ANSWER TO A QUESTION?

Do you have a question in connection with your growing of camellias on which you would like to receive some advice, or possibly an answer? To fill such needs, the Southern California Camellia Society has set up an Information Service, which presently is being headed by Willard F. (Bill) Goertz, 1835 Carlisle Drive, San Marino, California 91108. He would be the last to admit that he has or can obtain the answers to all camellia growing problems. He personally can answer many of them, and when he faces a problem about which he does not have the answer, he can call on the many good camellia growers in Southern California for help. Use the service!
