THE COVER FLOWER

The cover flower 'Ann Day' is courtesy of American Camellia Society. 'Ann Day' is a ten-year-old Hybrid ('Crimson Robe' X 'Tiffany') that first bloomed in 1968; originated by W. E. Sellers, Mobile, Ala., and propagated by Wilkes Nursery, Moultrie, Ga. Plant growth is upright, rapid in rate with dark green leaves measuring three inches in length and one inch in width. Flowers open well — varying shades of pink in bloom — large petaloids — tight cluster stamens. Blooms mid-season to late.
